

## UI Developer

### About Company

VuNet Systems( [www.vunetsystems.com](http://www.vunetsystems.com) ) is building innovative and next generation solutions to vastly improve IT operations for the new age digital enterprise. Our core offering is a big data analytics based software product, which brings together and correlates real time information across users, network and applications.

VuNet Systems is founded by a group of professionals, who previously have worked with top tier MNCs. The team has vast experience in developing carrier class networking equipments, software and analytics platforms.

### Job Description

Senior UI Developer for a Software Product Startup, working on a ground breaking BigData Analytics based product for IT operations.

### Roles and Responsibilities

- Primary responsibility is to take up ownership for UI features, work with the larger product team, arrive at best architectural approach, choose most appropriate UI frameworks, code and deliver
- Shown success as an individual contributor. Should have consistently demonstrated ability and commitment to deliver major initiatives in a timely manner
- Embrace good development practices including design specification, coding standards, unit testing and code reviews
- A self-starter, who loves to take on hard problems, enjoys breaking things and working in startup environments

### Skills and Experience

- 5+ years of experience as UI developer
- Strong experience and expertise in two or more of the following areas - Angular JS, D3, node JS, HTML5, Ajax, CSS3, javaScript, jQuery, bootstrap or any other equivalent frameworks
- Should have independently handled UI module Architecture design
- Develop and test across multiple browsers and platforms

### What We Offer ?

Along with a competitive salary, we offer a generous employee stock option plan and a fun work atmosphere, with other talented, motivated and interesting co-workers. You will also be working on cutting edge technologies, where you take ownership of end to end development. You will get ample opportunities to learn and grow your abilities and be part of a very enriching journey.

### How to Apply ?

If you are interested, e-mail us at [jobs@vunetsystems.com](mailto:jobs@vunetsystems.com), with your resume and an explanation of why you would be a good fit. But what we would also like to see is some code you have written. We look forward to hearing from you.
